

# Virginia Tech Presentation Template

## Subtitle

Author: Jonathan Gendron

Department of Economics  
*email@vt.edu*

# Table of Contents

# Title

**To use this template, you can copy and just edit/add slides!**

This is because all of the color customization occurs in the "Customize Themes" section in lines 12-51 of the code

The remainder of these slides serve as an example to show all the features you can use: bullets, buttons, sections, etc.

*This was a labor of love, I hope you like it!*

# Another Title

and a subtitle!

Look at the code of this slide to see how columns made this formatting look nice.

Left Footer

Middle Footer

# Yet another title

You can use bullets too:

- Like this one
- & this one

# A title

- You can also nest sub-bullets
  - Sub-bullet 1
  - Sub-bullet 2
  - Sub-bullet 3
  - Sub-bullet 4

You can add citations<sup>1</sup> too

**Below is a button that links to a slide in the appendix**

▶ Go to graphs

---

<sup>1</sup>Tjstheim.

# The Test Statistic

Here is a made up equation:

$$\hat{A} = \bar{m} - \hat{m}_S$$

Notice how these buttons are centered and evenly spread out:

[▶ Go to Terms](#)[▶ Go to Definitions](#)[▶ Go to Theorems](#)

# No way, another title!

- 1 Instead of bullets, you can index by number too
- 2 like this

## Second to last title

Block Title

Block 1

Example Block Title

Block 2

Alert Block Title

Block 3

Block without a title

# Last title

Last bit of text

# Questions?

# References I

## Appendix - A figure

◀ Return to presentation

# Appendix - Terms

## Some Estimators:

- Drift:  $\hat{\delta}$
- Boundary:  $\hat{b}(t)$

## Some Variables:

- $\hat{V}$
- $\hat{m}_S$
- $\bar{m}$
- $m_J(\tau)$

◀ Return to presentation

# Appendix - Definitions

## 1 A definition

◀ Return to presentation

## 1 A theorem
